

UNIT 1

1. Define Statistics ?
2. Explain the importance of statistics ?
3. What are the scope of Statistics ?
4. Explain the limitations of statistics ?
5. Explain data collection ?
6. Define primary data and secondary data ?
7. Define Secondary data and its Types
8. Define Attributes & Variables ?
9. Characteristics of classes in frequency distribution table?
10. Define discrete Variables & Continuous Variable?
11. Define Ogive Curve ?
12. Define frequency density?
13. Define Relative frequency ?
14. Find Relative frequency
15. Write short notes on Limitations of statistics
16. Find cumulative frequency of less than ($<$) and more than ($>$) type
17. Find frequency density
18. Explain Data Collection And its Types with an Example.
19. Write the methods of collecting data.

UNIT 2

1. Define simple bar graph ?
2. Define multiple bar graph ?
3. Differentiate simple bar graph and multiple bar graph ?
4. Define pie chart ?
5. Define histogram?
6. List down the steps to construct histogram?
7. List down the steps to construct frequency polygon ?
8. Define frequency polygon ?
9. Define frequency curve ?
10. Draw bar graph and multiple bar graph
11. Construction of frequency Polygon?
12. Problems on Pie chart
13. Draw histogram
14. Draw frequency polygon
15. Draw frequency curve
